Note: Some type of cards are supported using additional adapters

M6550 SD Memory Card Duplicator

Included Front Panel Functions

Copy master to copy cards	Set up user job	Set up card type
Verify master against copy cards	Copy log to USB drive	Set up card parameters

Computer Interface

The M6550 has a standard RS232C port, which allows connection to a standard Windows computer. An optional Windows XP Program is available for remote control of the M6550. The program provides a better logging feature and also help to modify job easily.

Duplication Speed

Duplication speed is independent of number of cards duplicated. The times quoted will vary widely both by card type and card manufacturer. The typical rate for fast SD cards is 360MB/min
