

M6240 USB Flash Drive Duplicator

NEW... USB Production Duplicators from the Industry Leader

Simple to Use Fast Reliable Versatile

Features

- High Quality, Stand Alone USB Flash Drive Duplicator for 1.1. & 2.0 USB
- Supports USB 1.1 & USB 2.0 Flash Drives
- Separate Master Drive Slot and Ten Copy Drive Slots
- Typical Program Speeds >300 MB/Min for Fully Loaded Machine
- Win PC Program for Setup and Control Using Standard USB 2.0 Port
- Automatic Sizing and Size Checking of the Master and Copy Cards
- Fast Verify: All Copy Devices Verified in Parallel at >300MB/Min
- Automatic FAT16 copy or Binary Image Copy

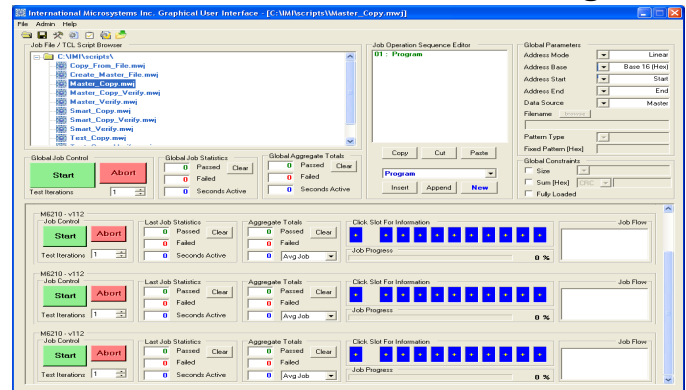

M6XX-CS Features.....

- ◆ **User Defined Jobs**
- ◆ **Simple Setup and Execute from User Win PC**
- ◆ **Creation and Storage of Master Data**
- **Interfaces to M6240 using standard PC USB 2.0 port**

M62XX-CS Win PC Control Program

M6240 ... A Simple yet Powerful Stand Alone Production USB Duplicators

The M6240 production USB duplicator is made from four IMI M6210 ten slot USB duplicators. Each of the ten slot sections is referred to as a "Slice". When the four M6210 Slices are hooked to the Win PC program, M62W, together they become one M6240 forty slot USB duplicator. Each ten slot Slice is easily used in a Stand Alone Mode. The front panel keys allow the user to select from a number of standard functions shown on the LCD display.

In a typical duplication job for the 40 slot M6240, four master USB drives are loaded into the M6240 Master Slots and forty copy USB drives are loaded into the forty M6240 USB drive copy slots. The Start Key on each of the ten Slot M6240 Slices are then depressed, and all 40 copy drives are programmed with the exact data on the Master Drives. An optional, **yet highly recommended Parallel Verify operation**, is then normally performed which does a bit by bit check on all copy drives and produces an eight digit checksum which can be used as an audit check on all future duplications of the same master drive.

The M62XX-CS Win PC program allows job setup and control from a standard Win PC. M6240 jobs are configured using the M62XX-CS software and can be selected from either the M62XX-CS Win PC program or the M6240 front panel interfaces.

M6240-USB Specifications

ROHS Compliant

Copy Capacity:	40 Copy Slots
Speed:	> 300MB/min for fully loaded machine
Display:	24 x 2 LCD (each slice)
Power Supply:	200W 115V/230V SPS (each slice)
Dimensions:	15"x14.5"x16.5" (W,D,H)
Computer Interface:	USB 2.0 Device Port, 10/100 Ethernet
Weight:	60 lbs (28 Kg)

System Part Numbers Description (USA/Canada Domestic Prices Only)
